

Key Stage 2 Art

Week beginning Monday 8th February 2021

Welcome to a lesson created by Tom Quigley

For this Art session you will need a piece plain paper, a pencil, a selection of different items from around your house (in this video he uses kitchen utensils in a pot) and access to the internet to play the video.

This lesson has been chosen as it builds on the observational skills that you have been refining this term. This lesson focuses on proportion and using your pencil to help measure out your objects and angles, keeping things in proportion. A great tip that I think you will really enjoy using!

We would love to see your observational drawings that you create using this technique, so please do send us a photo 😊
